*1,750* 

#### **Summary**

Each year, on a designated day during the last ten days of January, Marion and Polk counties conduct a comprehensive count of the homeless population. Thousands of individuals across both counties experience homelessness each year. The vast majority of these are individuals for whom life has dealt a crushing blow: serious illness, abuse, addiction, inability to work, collapse of a family, and ultimately the loss of a place to live.

The Homeless Count serves the community in the following ways:

- Increases our understanding of homelessness, including information about the causes and impacts of homelessness.
- Provides us the information needed to plan and identify resources and services to better help individuals out of homelessness, and prevent it in the first place.
- Accurate homeless statistics are necessary to receive continued federal funding (almost one million dollars annually) for homeless programs in Marion and Polk counties.

The Count is a community-wide event facilitated by Mid-Willamette Valley Community Action Agency, and supported by numerous community-based organizations. More than eighty community volunteers dedicated their time to assist with the surveys and provide outreach. The participation of partner organizations and volunteers is critical to the success of the Count, from the initial planning meetings, to the day of the count, and through the final stages of pulling the data together and reporting.

The following organizations participated on the 2013 Homeless Count Planning Committee and many also volunteered as Team Leaders the day of the Count:

- City of Salem Salem Housing Authority
- Marion-Polk Food Share
- Mid-Willamette Valley Community Action Agency
- Northwest Human Services
- ❖ Salem Interfaith Hospitality Network
- Salem Leadership Foundation
- Serving our Veterans at Home
- ❖ Shangri-La Corporation
- St. Vincent de Paul
- Union Gospel Mission

The 2013 Homeless Count was conducted on Wednesday, January 30<sup>th</sup> and was comprised of the following components:

<u>One Night Shelter Count:</u> a one-night (point-in-time) count of the number of beds being utilized through emergency shelters and transitional housing facilities and programs that are designated to serve homeless individuals and families.

<u>Homeless Street Surveys:</u> included Street/Mobile Outreach teams and Stationary Sites. Small groups of people comprised the Outreach teams. They canvassed the streets, parks, under bridges, and in camps. Volunteers were also stationed at designated site locations, including:

- Polk County Connect
- Cascade Gateway Park

- Marion Square Park
- ➤ MWV Community Action ARCHES Project
- ➤ MWV Community Action De Muniz Pine Street Resource Center
- ➤ MWV Community Action Home Youth and Resource Center
- Northwest Human Services HOAP
- Northwest Human Services Transitional Living Program

<u>Homeless Observed but not surveyed:</u> Outreach teams kept a log of individuals that they observed as homeless but did not have the opportunity to interview. Teams used their best judgment regarding "the observation of homelessness". For example, an individual at a secluded campsite not interested in participating in the survey would have been included in this count.

<u>Short Surveys:</u> conducted at the Department of Human Services (South Salem, North Salem, Keizer, Dallas, Sublimity, and Woodburn branches), Salem Hospital, food banks (Queen of Peace and Jason Lee), the NWHS Crisis Hotline, Salem Housing Authority, Salvation Army, and St. Joseph Shelter. Individuals and families seeking assistance were asked if they had already participated in the Count on January 30<sup>th</sup> (either through the Street Count or via the Shelter Count). If they responded no, they completed a brief version of the full survey.

<u>Jail Surveys:</u> All inmates were given the opportunity to be surveyed. Those respondents that reported they would be homeless upon release were included in the report. Surveys were conducted at the Marion County Jail and the Polk County Jail.

<u>School Counts:</u> Survey includes reports from twelve school districts in Marion and Polk counties. The school count represents the total number of homeless students who were enrolled in the Homeless Education Program for each school district on the day of the Count. The total number of homeless students was reliant on each district's definition of who is eligible for enrollment in their program.

The total number of homeless individuals counted in Marion and Polk counties on January 30, 2013 was 1,750. Comparatively, the total number of homeless individuals counted on January 25, 2012 was \*718, and the total number counted on January 27, 2011 was 3,064.

\* For the 2012 Homeless Count, HUD revised the method for calculating the total to exclude School Counts and certain shelters/housing providers that do not dedicate their beds for homeless individuals only. This produced a count that was drastically lower than the previous year.

	2012	2011
One Night Shelter Count	456	897

## Street Count Surveys

On January 30, 2013, over 80 community volunteers conducted 181 interviews with people who were homeless, with no permanent place to reside in Marion and Polk counties. The interviews were conducted on the street, in parks, under bridges, in camps, and at area homeless service organizations. All participants were informed that their names would not be collected and that their participation was completely voluntary.

\* Percentages are calculated based on the total number of respondents that answered each question.

#### **Demographics**

- Street interviews resulted in data collected from 135 males, 42 females, and 4 that did not disclose.
- Single adults made up the majority of the household types at 146 or 90% of all households.
- The average age range for adults was 36-50.
- 81% of respondents described themselves as White for their Race/Ethnicity.
- Education level varied, but the majority of those surveyed (74%) did not have higher than a high school degree.

#### **Homeless Characteristics**

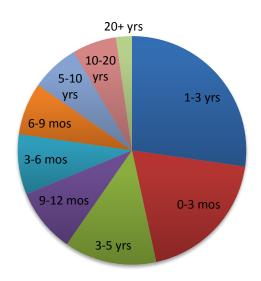

- 78 respondents (44%) indicated they have been homeless for less than 1 year. 27 (15%) had been homeless at least 5 years.
- The most common response for "length of current episode of homelessness" experienced by respondents was 0-3 months.
- The majority (67%) of respondents were staying on the street or camping (26%) the night the survey was conducted.
- Nearly three quarters of respondents reported they were able to eat regularly, and 68% were able to eat twice a day or more.
- More than a quarter of the respondents had no income. 37% reported making between \$1 \$500 a month.
- The most common method of gaining income was panhandling (19%), followed by Social Security/Disability (13%) and Government Assistance, most often food stamps (13%).
- More than half of survey respondents were looking for a job.
- More than half (56%) qualified as chronically homeless.

<u>Definition of Chronically Homeless</u>: An individual who 1) is homeless and lives in a place not meant for human habitation, a safe haven, or in an emergency shelter; and 2) has been homeless (in one of the above mentioned locations) for at least one year or on at least four separate occasions in the last 3 years; and 3) can be diagnosed with one or more of the following conditions: substance use disorder, serious mental illness, developmental disability, post-traumatic stress disorder, cognitive impairments resulting from brain injury, or chronic physical illness or disability.

- The three most common reasons for homelessness were "Couldn't Afford Rent" (31%), "Unemployed" (36%), and "Criminal History" (13%).
- The two main factors respondents believe could improve their current situation are affordable housing and a job/income.

Other	18	12%	6	23%
No Response	7		5	

### **Hardest Part About Being Homeless**

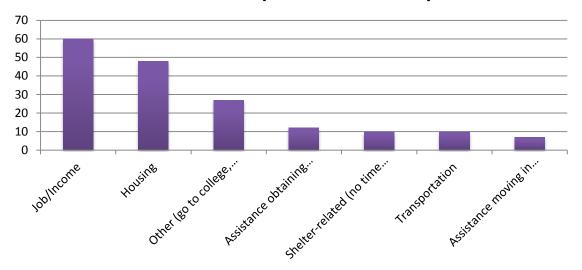

#### What can be done to improve your current situation?

Percentages (%) represent all respondents (e.g. 32% of Marion participants reported a job/income would help)

Job/Income	49	32%	11	42%
Housing	44	28%	4	15%
Shelter-related (no time limit, takes pets, for couples w/o kids, etc.)	10	6%		
Assistance obtaining SS/disability	9	6%	3	12%
Nothing/don't know	7	5%	1	4%
Assistance moving in (deposits)	6	4%	1	4%
Transportation	5	3%	5	19%
Assistance obtaining clothing/hygiene supplies	3	2%		
Assistance obtaining ID	2	1%		
Medical/Dental	2	1%	1	4%
Other (go to college, storage for belongings, etc)	32	21%	5	19%

**Top 7 Things that Could Improve Current Situations (Marion and Polk)** 

#### **Medical/Dental Issues**

- More than half of respondents had medical problems (69%) or dental problems (58%)
- Obtaining medical care is much more common than obtaining dental care: over half (57%) have seen a doctor in the past year while only 16% have seen a dentist in the last year.
- More than a third (42%) of respondents have not seen a dentist in the last 5 years compared to only 8% who haven't seen a doctor in the last 5 years.
- 119 participants (74%) reported having a disability, the most common one being a mental health problem (28%).

## Shelter Surveys

On January 30, 2013, 326 households and 486 individuals were surveyed at 20 different emergency shelters and transitional housing/shelter locations, including one safe haven location. See all participating shelters/housing providers listed on page 18.

#### **Demographics**

- Single adults made up the majority of sheltered families, followed by 45 single parents with children.
- Approximately 28% of those sheltered were under 21 years of age.
- 56% were male and 43% were female.
- 30 (7%) of the respondents were children of K-12 age.
- The majority (85%) of respondents described themselves as White and 18% were Hispanic or Latino.
- Almost a quarter (21%) qualified as chronically homeless.
- Almost half (44%) of respondents reported having a disability, the most common one being chronic drug abuse (20%).

## Jail Surveys

Surveys were conducted at the Marion County and Polk County jails. All inmates were given the opportunity to participate in the survey. 313 surveys were completed at the Marion County jail and 67 surveys were completed at the Polk County jail. 140 respondents total (Marion–112 and Polk–28) said they would be homeless with no designated place to live at the time of their release from jail. 18 (Marion–15 and Polk–3) of these respondents were scheduled to be released within the coming week.

#### **Demographics**

- 48% of respondents were 21 35 years of age.
- Almost 80% of the respondents were males.
- 29% of respondents did not complete high school or receive a GED.
- Only 23% had a valid Oregon driver's license and less than half (44%) had an Oregon ID card.
- Half of the respondents had children under the age of 18. The range of ages was wide from 1 to 17 yrs. Most families had 1 or 2 children.
- Half of the respondents had a faith community affiliation.

Lack of housing	22	21%	7	25%
Bad Choices	52	50%	19	68%
Other	14	14%	6	21%

#### **After Release**

- Only 34% of respondents knew when they would be released. Of those, 37% were scheduled to be released within one week.
- When asked what they needed to remain clean, sober, and crime-free, the two most common responses were "housing" and "employment."

#### Release

Holouse				
Knows release date	37	33%	11	39%
Will be released in one week	15	41%	3	27%
Upon Release				
Has a job to go to after release	15	13%	4	14%

## What do you need when you are released to stay clean and sober and crime free? (Most Common Responses)

Percentages (%) represent all respondents (e.g. 32% of Marion respondents believe they need housing after they're released to stay clean, sober, and crime-free). Respondents could list as many factors as applied to their circumstance.

Housing	36	32%	11	39%
Employment	23	21%	11	39%
Family	14	13%	2	7%
Fresh Start	3	3%	3	11%
Church/Jesus	8	7%	3	11%
Support	19	17%	5	18%
Treatment	15	13%		

#### **Medical and Treatment Issues**

- About 43% of respondents report having a disability, the most common being a mental health disability (44%).
- Less than half (41%) of respondents said they had medical issues, and 40% of respondents stated they had dental problems.

Persons with a Disability		Specific disabilities reported							
	Mario	n	Polk			Mario	n	Polk	
Yes	44	43%	11	41%	Mental Health	24	55%	7	64%
No	58	57%	16	59%	Physical	13	30%	5	46%
No Response	10		1		More than one	18	36%	1	9%
Total	112		28						

#### **Medical/Dental Issues**

Has medical problems	49	44%	8	29%
Has dental problems	43	38%	12	43%
