Our Mission

Providing vital services and
resources; meeting the needs
of our community

Energy Conservation

Tips:

- ◆ Set winter heating temperatures to 68 degrees.
- ◆ Set summer cooling temperature to 78 degrees.
- ◆ Use LED light bulbs to save up to 80% on lighting cost compared to incandescent lights.
- ◆ Refrigerators should be kept between 36-40 degrees.
- ◆ Freezers should be kept between 0-5 degrees.
- ◆ Electronics that are turned off may continue to use power. Unplug convenient electronics and plug others into a power strip.

Community Action Agency

Weatherization Program

A Quick Guide

Do you need Weatherization?

Weatherization can drastically reduce electric and gas bills. If your home is drafty, musty or too cold during the winter you could likely benefit from weatherization.

Description of possible weatherization services:

Energy Audit: This is an assessment that will be performed to determine the weatherization needs of your home.

Insulation: Depending on existing R-values and accessibility, insulation may be added to attics, floors, walls and duct systems to improve overall energy efficiency of your home.

Air sealing: Minimizes excessive drafts by caulking interior molding/trim, sealing around plumbing/drain pipes protruding through floors/walls and weather-strip doors.

Ventilation: Adding proper ventilation can help create a healthier living environment and reduce moisture levels in a home.

Steps of the Weatherization Program:

- 1) Fill out a pre-screening form. call us at 503-315-7055 to have one mailed to you.
- 2.) When your name comes to the top of the list we will contact you to set up a face to face intake appointment to determine if you qualify for the program.
- 2) During your intake appointment you will also attend an energy education session.
- 3) An energy audit will be performed. This will include an assessment of the efficiency of your home.
- 4) The weatherization work begins. Licensed contractors may install insulation, reduce air leaks and perform other energy saving measures.
- 5) A final inspection will be performed to insure the compliance with policies, quality of craftsmanship and safety of all weatherization measures.

How to qualify for weatherization:

- Be a Marion or Polk county resident who owns or rents.
- Provide supporting documentation for household members and utility company.
- Provide proof of income within these guidelines:

Family Size	Gross Annual Income	Gross Monthly Income
1	\$24,280.00	\$2,023.33
2	\$32,920.00	\$2,743.33
3	\$41,560.00	\$3,463.33
4	\$50,200.00	\$4,183.33
5	\$58,840.00	\$4,903.33
6	\$67,480.00	\$5,623.33
Each additional member	\$8,640.00	\$720.00
